

Nếu gặp lỗi này:

Add Server Instance

Steps

1. Choose Server
2. **Installation and Login Details**

Installation and Login Details

Specify the Server Location (Catalina Home) and login details

Server Location:

☐ Use Private Configuration Folder (Catalina Base)

Catalina Base:

Enter the credentials of an existing user in the manager or manager-script role

Username:

Password:

☒ Create user if it does not exist

The specified Server Location (Catalina Home) folder is not valid.

< Back Next > Finish Cancel Help

Thì sửa như sau:

1. Download Netbean 8.2 và apache tomcat 8; sau đó giải nén ra 1 thư mục
2. Cấu hình catalina_home như sau:

Edit System Variable

Variable name:

Variable value:

3. Cấu hình lại như sau:

Servers

×

Servers:

Servers

Apache Tomcat or TomEE

GlassFish Server 4.1.1

Server Name: Apache Tomcat or TomEE

Server Type: Apache Tomcat or TomEE
